

APPLICATION NOTE

MAY -2011

Project: **GREENHECK - SAPPHIRE FINISHING MILLS LTD, (Raiwind).**

Application: Exhaust fans for Steam exhaust in finishing unit with AMCA Certified and to have long life with energy saving.

Renowned Consultant **Fahim, Nanji & DeSouza & Co**, initiated enquiry for high performance ventilating fans for their project at Sapphire Finishing Mills Ltd in Raiwind with very high specs. Tube Axial Inline Fans based on 50C ambient temp., with chemical resistance coating to avoid rust / damage for longer life as previously used fans lasted only in 1-2 years.

After winning the project by **Khan Brothers** and its successful in-time supply of the order, the Fans were installed by Sapphire in November, 2010, and are in operation for the last six months, giving accurate performance as required by **Fahim , Nanji & DeSouza** the consultant to the Project

Remarks from Sapphire Finishing Mills

Greenheck Tube Axial Model # TBI-CA are running very much satisfactorily since last six months on Steam application with promised performance..
